Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 219, *Floor coverings*, in collaboration with the European Committee for Standardization (CEN) Technical Committee CEN/TC 134, *Resilient and textile floor coverings*, in accordance with the Agreement on technical cooperation between ISO and CEN (Vienna Agreement).

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.

Resilient floor coverings — Expanded (cushioned) poly(vinyl chloride) floor covering — Specification

AMENDMENT 1

Normative references

Delete footnote ¹⁾.

Replace the reference to ISO/TR 4918 with ISO 4918.

Replace the reference to EN 424 with the following:

ISO 16581, *Determination of the effect of simulated movement of a furniture leg*

Clause 4, Table 1

Add the following footnote ^{a)} after the reference to ISO 105-B02:

^{a)} Test until blue wool scale No. 6 according to ISO 105-B02. Compare this sample with a reference sample which was stored in the dark.

4.1, Table 2

Delete the row referring to "Class22+" from the table.

Replace the reference to EN 424 with ISO 16581.

Clause 5

Replace the reference to ISO 26986:2010 with ISO 26986.

Annex A

Delete “:2010” from the reference to ISO 9239-1 and ISO 11925-2.

Delete the 8th bullet point.

Bibliography

Delete the following references from the bibliography:

EN 653, *Resilient floor coverings — Expanded (cushioned) polyvinyl chloride floor covering — Specification*

ASTM E645, *Standard Test Method for Efficacy of Microbicides Used in Cooling Water Systems*

Delete “-9” from the reference to ASTM E648-9.
